

# PARTIALLY SURVEYED TOWNSHIP 0 SOUTH RANGE 0 WEST OF THE WILLAMETTE MERIDIAN, OREGON

Protraction Diagram No. 40, accepted 7/15/1966  
File No. 14 (33FR4215 3/6/1968)

Identifies plat from which unsurveyed lands and protracted acreages were designated.

The unusual method of lotting shown in Section 6 and 7 was used only between 1851 and 1866. Two lot 1's and two lot 2's were designated in the sections along the northern and western boundaries of the township. Patenting part of the lots, as shown in Section 7 created so much confusion that the practice was dropped in favor of the lotting technique used today. The public domain lands in the west half of Section 7 would be described as that part of lot 1 in the NW1/4SW1/4, that part of lot 2 in the NE1/4SW1/4, and that part of lot 2 in the SE1/4SW1/4.

County in which the township is located; if in more than one county, the boundary and names will be shown as below.

**BENTON COUNTY**  
**SALEM - EUGENE**

BLM district or districts in which township is located; district boundaries not depicted.

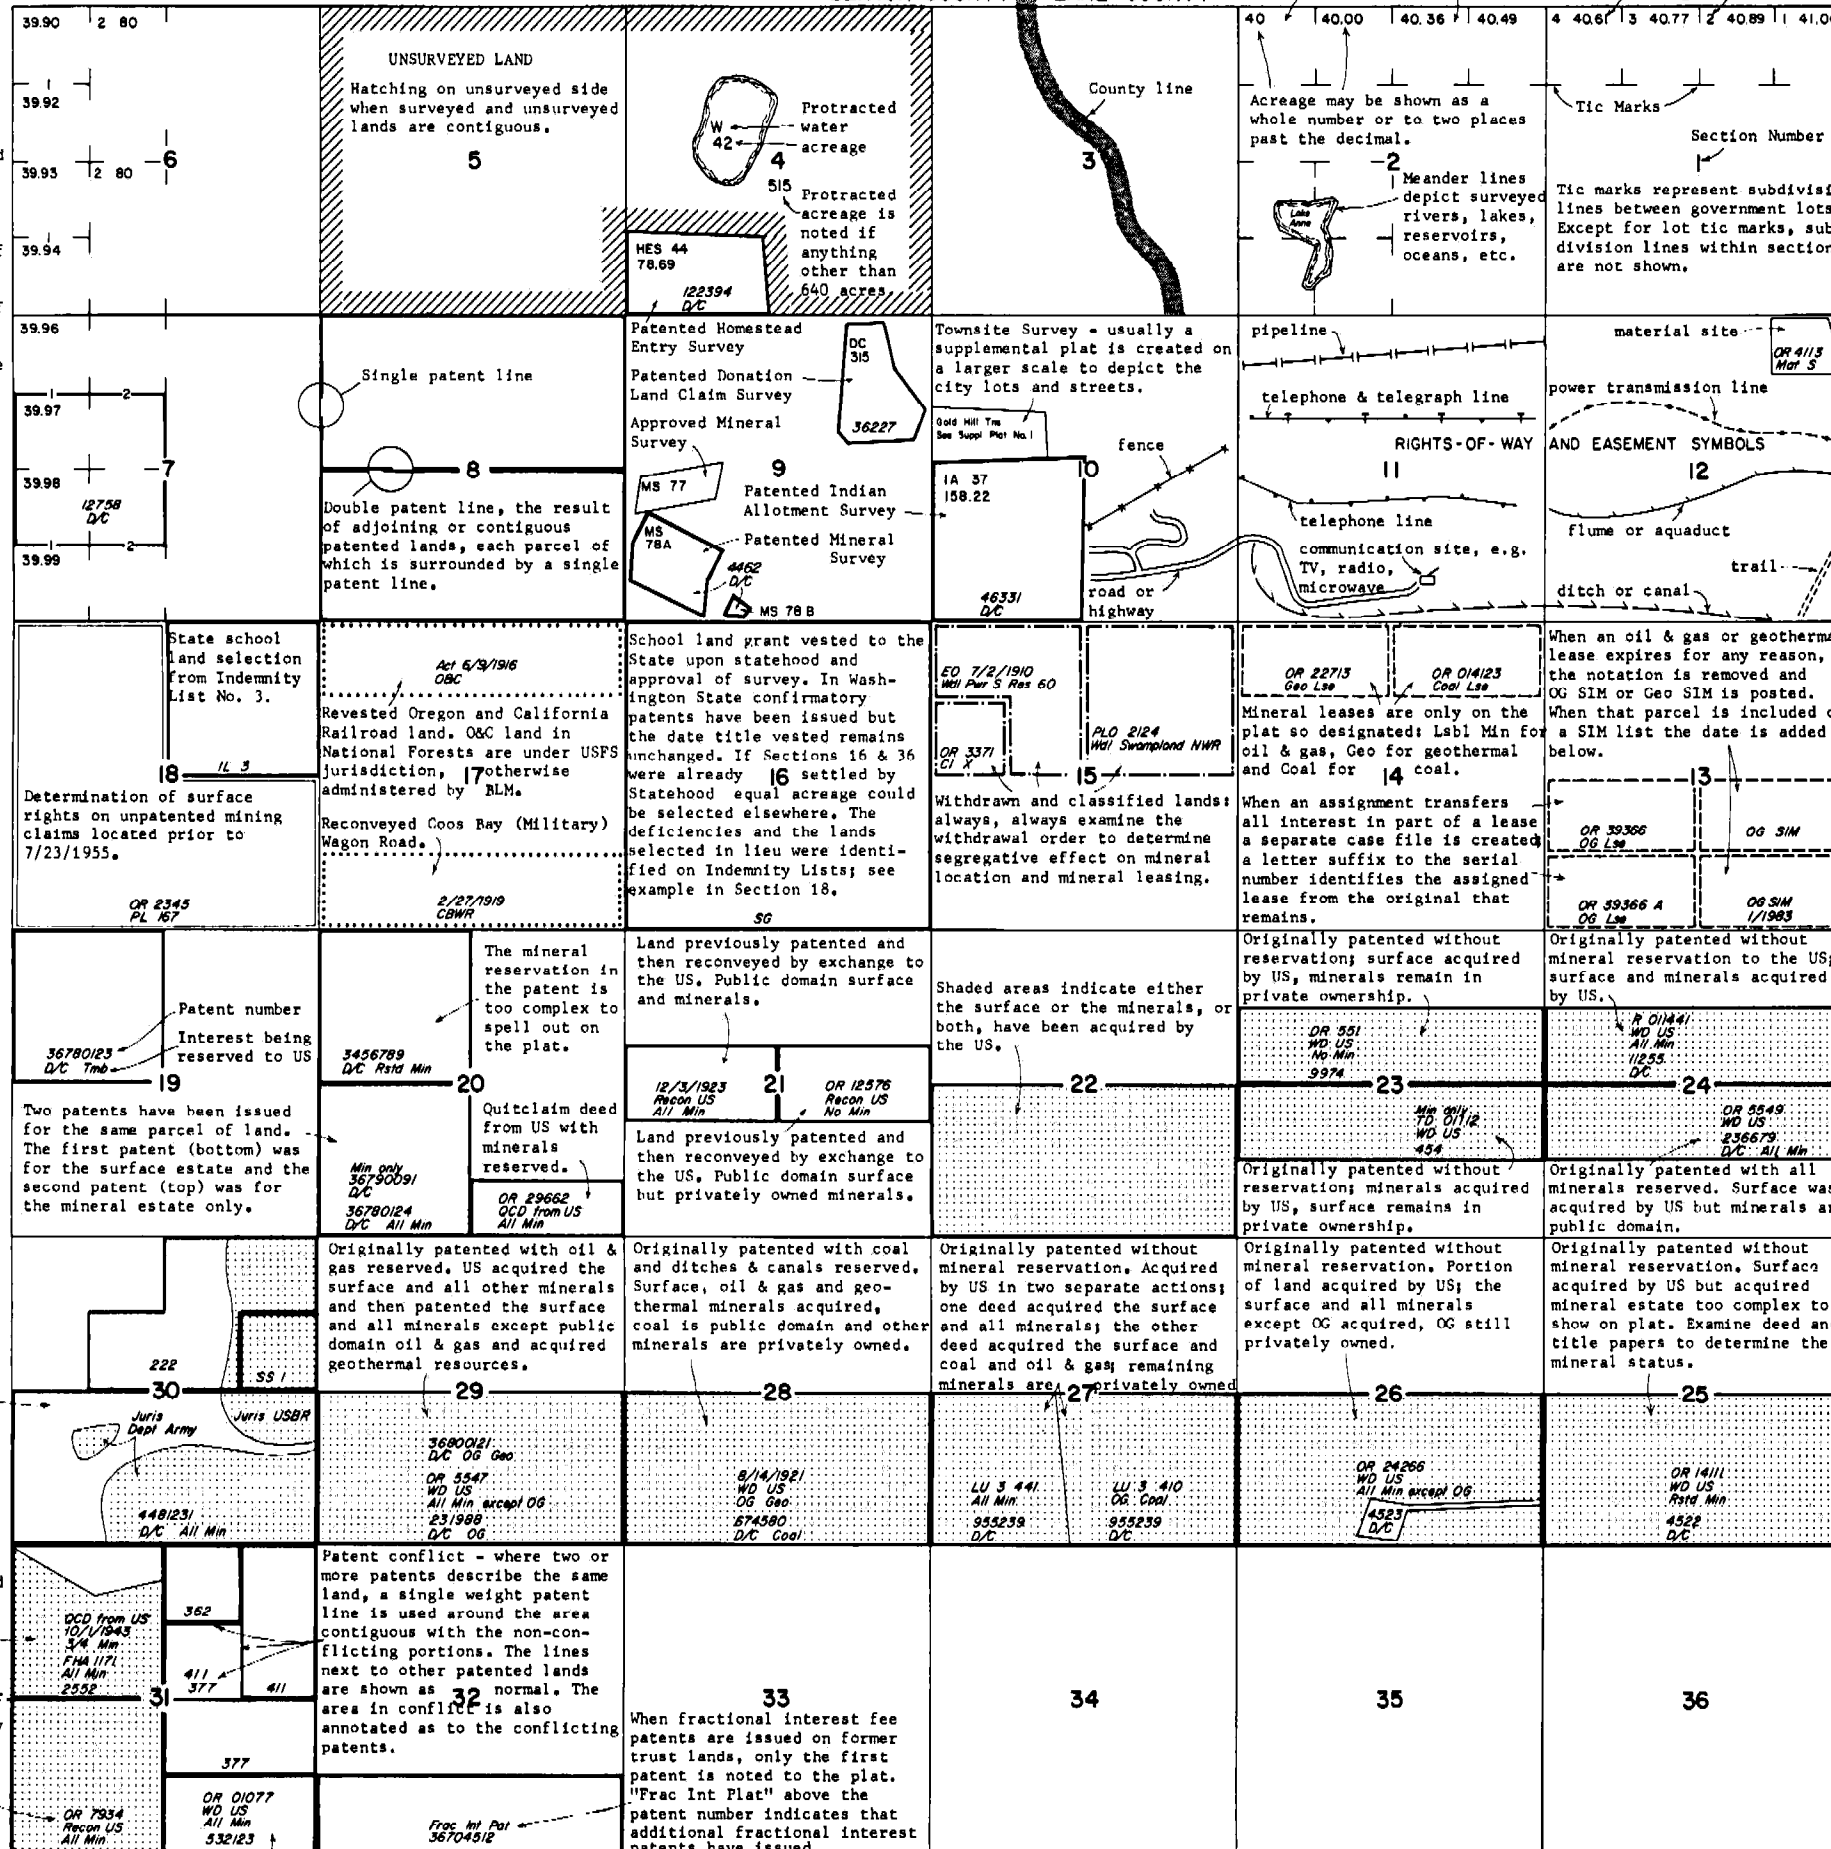

**BENTON COUNTY** **LANE COUNTY**

TITLE OF PLAT: MT = Master Title  
Lsbl Min = Leaseable Mineral  
Geo = Geothermal Resources  
Coal = Coal

All Oregon and Washington townships are surveyed from Willamette Meridian and base.

**SAMPLE MARGIN ENTRIES:**  
Margin entries are made when documents, actions or status information can't be depicted due to insufficient information, lack of appropriate record notation standards, or other extenuating circumstances.

Plat is date stamped each time a notation is made and a film record generated. When copies are furnished to the public a second date stamp appears below.

CURRENT TO	BY
AUG 30 1984	
OCT 3 1982	

Some lands have been identified as acquired by other Federal agencies. However, as complete documentation has not been provided to BLM, these lands are noted only as to which agency has jurisdiction. The managing agency must be contacted to determine surface and mineral status.

Originally patented without mineral reservation. Acquired by FHA and later quitclaimed from FHA with 3/4ths of all minerals reserved to the US. PL 760 later transferred jurisdiction of the acquired minerals to Dept. of Interior Weeks Act Exchange - the only occasion in which land received by the US in exchange of public domain land takes on acquired land status.

Land conveyed to the US in exchange for acquired US land is considered public domain. Unlike other exchanges the record notation shows "WD US" rather than "Recon US". This type of exchange can be distinguished from acquisitions by the absence of shading.

The original record is drawn to a scale of thirty chains to the inch. However, due to variable lense ratios used in filming the record (16X) and making copies for public inspection (10X, 14.5X), 1:1 reproduction of the record is not possible. Other states using different types of film processes or equipment may be able to provide 1:1 reproduction.
